Opening Agreement

Please read through the following and return the second page to us before your scheduled opening.
We look forward to ensuring you enjoy your backyard oasis this year.

Base price \$290 includes:

Returning any cleaned and repaired equipment	Removal and folding of cover
Removal of plugs & gizmos	Delivery of pre-ordered season chemicals
Connecting and starting equipment	Installing ladders and handrails
Diagnosing any faulty equipment	Fixing equipment leaks
Brushing of waterline and steps	Up to 1.5 hours of labor is included
Adding initial startup chemicals	

Initial chemicals are not included and can vary by pool. Starting chemicals usually range between \$68 for chlorine pools and \$140 for salt pools. We use BioGuard brand chemicals to ensure the best water possible.

Additional equipment, standalone spas and distance charges may also apply.

- Same day returns are not always possible as it is an inconvenience to other scheduled customers. If a second trip is required due to the pool not being ready to be opened on its scheduled day, a fee of \$55 will be added to your opening.
- All excessive water and debris from covers must be removed by the homeowner *before* scheduled opening.
- Equipment that was stored for the winter must be left outside or made accessible, gates and any accesses to pool and equipment unlocked, electrical and water services turned on and available. If you have a propane heater, check and fill the tanks.
- Vacuuming and/or additional full cleaning is not included in the opening. Contact our service department for maintenance/cleaning options if you are interested in additional services.
- Any parts and labor to repair equipment is at additional cost and may or may not be able to be completed poolside the day of your opening. You will be contacted if any equipment needs any kind of shop repairs, parts need to be ordered or any equipment needs to be replaced.
- Initial chemicals are not guaranteed to clear pools with excessive debris and/or algae growth, will not always balance the water as needed, and may not bring salt levels (if applicable) high enough to produce chlorine.
- Your pool water may be lower than needed for operation. We will let you know how much will be needed. If equipment cannot be started at your opening due to low water levels a 2nd visit may be needed.
- A water sample is recommended to be brought to our lab after 24-48 hours for a chlorine pool and 72 hours for a salt pool to help you give your pool any additional balancing needed to have a good start to the summer.
